### ABSTRACT

This article attempts to review the status of economic development of the state Andhra Pradesh post bifurcation of the hitherto Andhra Pradesh into Telangana and Andhra Pradesh states, and ascertain the issues and challenges in the sunrise state Andhra Pradesh.

### 1. Introduction

Andhra Pradesh state bifurcation into two separate states –Telangana and Andhra Pradesh – was done on 1st June, 2014 according to the AP Reorganisation Act, 2014. Hyderabad city which was the capital of the undivided Andhra Pradesh state went to Telangana in view of the geographic location. As per section 5(1) of the AP Reorganisation Act, 2014 both Telangana and Andhra Pradesh states will have Hyderabad as common capital for a period of ten years. After the expiry of this ten year period Hyderabad will be the state capital of Telangana and Andhra Pradesh will have a new capital as per section 5(2) of the above act. However, the AP Government wanted to speed up the process of construction of the new capital rather than taking advantage of the ten years period as specified in the Act.

### 2. New Capital City- Amravathi

Andhra Pradesh Capital Region Development Authority Act, 2014 (Act.No.11 of 2014) was enacted for the declaration of the new capital area for the state of the Andhra Pradesh and a separate authority by the name APCRDA (Andhra Pradesh Capital Region Development Authority) was created for the purpose of planning, co-ordination, execution, supervision, financing, funding and for promoting and securing the planned development of the capital region and capital city area for the state of Andhra Pradesh. Accordingly the foundation for the new capital city at Amaravathi (located between Vijayawada and Guntur cities) was laid on 22nd October, 2015. On 2nd March, 2017 an interim assembly building was inaugurated and interim secretariat building was inaugurated on 20th November, 2017 thereby paving the way for regular functioning of the government from the new capital Amaravati.

### 3. Unique Land Pooling Concept

AP government has followed a unique concept of land pooling in order to overcome the huge financial burden and other hurdles involved in the routine process of land acquisition. Under this land pooling, the land owners (mostly farmers) have surrendered their lands to the government for development of the capital city and in turn they would get back a portion of the developed plots of the capital city backed by good infrastructure. Additionally, they would also get an annual financial compensation for a period of 10 years.

Around 33,000 acres of land has been acquired through this novel land pooling concept and the central government in its 2017-18 budget has given capital gains tax exemption to the land owners who have given their lands under the land pooling mechanism for the construction of the capital city Amaravati.

It is learnt that Harvard University is planning to study the Amaravati land pooling system in view of its unique features. In the earlier undivided state of Andhra Pradesh, all the development was totally concentrated within the capital city Hyderabad resulting in total neglect of the other cities and towns across the state. Therefore, critics have cautioned against repeating the same mistake in developing the new capital city at Amaravati. However, the AP State government has decided to build the new capital Amaravati as a world class city with a highly ambitious plan.

#### 4. Industrial Growth

The AP Reorganisation Act envisages sanction of special development package by the central government to the backward regions of Rayalaseema and north coastal regions of AP. Accordingly in seven districts of AP viz., Ananthapur, Chittoor, Cuddapah, Kurnool, Srikakulam, Visakhapatnam, Vizianagaram any manufacturing undertaking set up during the period from 01.04.2015 to 31.03.2020 is eligible for 15% of higher additional depreciation and 15% of investment allowance on the cost of plant and machinery acquired by it during the above period. The centre has also sanctioned Rs. 1,050 crores to the above seven backward districts covering the period 2014-15 to 2016-17, and in the process each of these backward districts received Rs. 150 crores. Centre has committed to pay a further sum of Rs. 1050 crores in due course.

#### 5. AP is the first state in the country which has enacted the industrial single window clearance

AP state has put in place for the sectors like- auto mobile, IT, aerospace, defense, electronics. The World Bank has ranked Andhra Pradesh number one in Energy Efficiency Implementation Readiness.

#### 6. Agricultural Growth

In the agricultural sector the state has made considerable progress after 2014. The state government has taken up and completed Pattiseema lift irrigation project costing Rs. 1,300 crores in a record time of one year in March, 2016 and entered into the Limca Book of Records. This project has become a boon to the farmers in four districts in Krishna delta covering nearly 13 lakh acres. Enthused by the success of Pattiseema Project, AP state government launched Purushottapatnam Lift Irrigation Scheme costing Rs. 1,638 crores through the left main canal of Godavari River and its phase-I was completed in a record time of 225 days and commenced in August, 2017. 2.15 lakh acres of agricultural lands in East Godavari district are expected to get irrigation facility through this project. The above two lift irrigation projects are the off shoot of the Polavaram irrigation project.

Polavaram irrigation project in Andhra Pradesh will be the biggest dam dedicated to nation after Sadar Sarovar dam on Narmada river in Gujarat. Polavaram project diverts and utilizes the surplus waters of Godavari River into Krishna and other Rivers to make the state drought free forever, meeting the demands for irrigation, drinking water and industrial purposes. Every year 2,500 TMC waters of Godavari River go waste into the sea and the Polavaram Project is expected to divert 2.27 TM cum (80 TM cft) of Godavari waters into Krishna River. Though the Polavaram irrigation project is expected to be completed by 2019

#### 7. Fibre Grid Project

In December 2017, AP state has launched an innovative fibre grid project offering internet, telephone and cable TV services for Rs. 149 per month. While the first phase of this project targets urban households, the second phase aims to cover 9000 *gram panchayats* with the overall objective of covering education, telemedicine, e-governance, agriculture, rural development, and e-commerce in due course.

The fibre optic grid is one of the five grids being established by the AP Government; the four others are Water Grid, Gas Grid, Power Grid, and Road Grid. These 5 grids, 5 campaigns (Agriculture, Education, Health & Sanitation, Environment & Poverty Alleviation), 7 missions (Primary Mission, Social Empowerment Mission, Skill Development Mission, Service Sector Mission, Industry Mission, Infrastructure Mission and Urban Development Mission) collectively constitute e-pragati. The objective of e-pragati is to provide integrated services to the citizens and bring a transformational change in the functioning of the government. Government of Andhra Pradesh (GoAP) aims to realize the vision of 'Sunrise Andhra Pradesh' to be ranked among the three best States in Bharat by 2022 and the best State by 2029.

CORE-CM Office Realtime Executive Dashboard is an integrated dashboard launched in 2016 to monitor category-wise key performance indicators of various departments/schemes in real time. Users can check key performance indicators of various departments, schemes, initiatives, programmes, etc. This is consolidated and arranged in a single frame for effective monitoring by the chief minister of the state. **Andhra Pradesh is the first state to use the CM Dashboard technology in Bharat.**

## 8. Challenges

The fiscal deficit in 2016-17 was 3.66 percent of the GSDP (Gross State Domestic Product), marginally higher than the ceiling of 3.25 percent as per the FRBM (Fiscal Responsibility and Budget Management) Act of Andhra Pradesh. As the AP government is going ahead to create new capital city, improve the infrastructure across the state, apart from taking up several irrigation projects, there will be a spurt in capital expenditure which will lead to large borrowings. In order to repay these large borrowings along with interest, in due course the state needs to step up its efforts in revenue generation. On the other side the government is under compulsion of its poll promises to spend large sums towards various social welfare measures. The government is doing a tight rope walk trying to balance both economic development and social welfare measures.

### 9.1 Major Pending Issues

There are several pending issues under the AP Reorganisation Act which require central government's financial assistance and support and the major ones are-

- Developing a new major sea port in Dugarajapatnam in Nellore district,
- Setting up an integrated steel plant in Rayalaseema,
- Developing Vizag- Chennai industrial corridor,
- New railway zone in Vizag,
- Rapid rail and road connectivity between the new capital city Amravathi and other parts of the AP State and Telangana,
- Metro rail facility in Vizag,
- Vijayawada- Guntur- Tenali urban development authority,
- Financial support for completion of the Polavaram project which is a national project,
- Revenue deficit grant for 5 year period.

### 9.2 Political Factors

As the central government and the AP state government are being run by two different political parties though they are allies, both are vying with each other to get their share of credit keeping in view the forthcoming 2019 general elections. This has led to the state government rushing the things to show some tangible gains to the people of Andhra Pradesh before the 2019 general elections while the central government has adopted a wait and watch strategy.

One has to wait and see whether both the governments will come on the same platform to resolve the major pending issues under the AP Reorganisation Act mentioned above in the interests of the people of Andhra Pradesh before 2019 general elections.
